eFax Corporate®

Highly Encrypted Cloud Faxing for the Banking Industry

eFax Corporate's secure cloud faxing solutions reduce paper load, heighten accountability and traceability of fax documents, and lower costs.

Use of paper-based faxing exposes banking firms to unauthorized access of confidential documents and potential litigation. Fortunately, cloud faxing with eFax Corporate® protects the security of your data.

SOX
COMPLIANT

GLBA
COMPLIANT

The banking sector faxes a high volume of sensitive information every day, from individual and corporate client credit data to stock brokerage reports and mortgage applications. With security threats to personally identifiable information an ever-growing problem, protecting this data has become a primary concern.

Enter eFax® Corporate:

The world's most experienced provider of secure online fax solutions. We've securely faxed hundreds of millions of pages since 2000, and help keep the banking sector in compliance with SOX and GLBA regulations.

Highest Encryption Levels

256-bit AES and TLS encryption protect your inbound faxes.

Tier-III Secure Servers

Servers in highly secure data centers keep your faxes protected 24/7/365.

Transport Layer Security (TLS)

Is opened and a PIN required when you access your fax online.

eFax Corporate® is Your Source for Corporate Compliance

Chances are that your staff sends and receives a great deal of its financial records via networked fax servers and desktop fax machines. Depending on the method of transmission, these antiquated methods can place your business at risk of non-compliance with SOX, GLBA and other data privacy regulations.
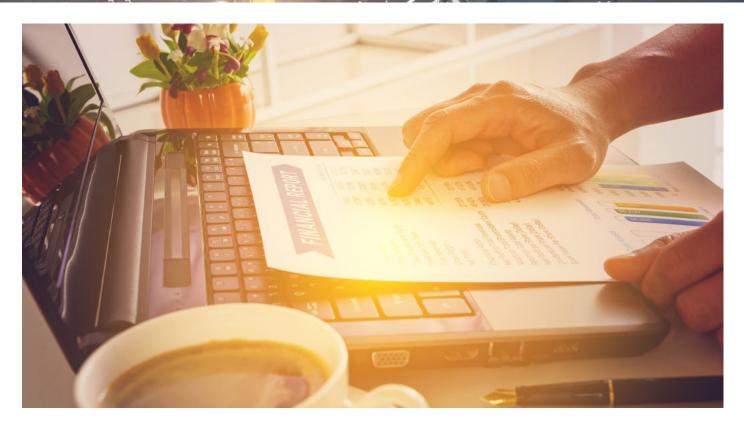

Sarbanes-Oxley and Gram Leach Bliley places tough privacy, security and accountability rules on business and their executives. The stakes are high if organizations do not meet the standards for corporate compliance.

- To meet corporate compliance requirements, in many instances, means that organizations must find business process automation and information delivery solutions that can help protect communication security and accountibility while providing fast, efficient delivery of governed business information.

- By supporting corporate compliance, eFax Corporate® allows your organization to securely process, manage, track and distribute the corporate data documents in a way that demonstrates accountability, control and transparency.

- A feature rich fax solution, eFax Corporate® directly supports compliance efforts through improved document and information management, workflow and process automation, communication and collaboration, and monitoring and reporting functions.

Banking institutions around the country have discovered a secure, efficient, and cost-effective alternative to paper faxing: eFax Corporate®. Send and receive confidential documents securely by email with eFax-- from any desktop, tablet or smartphone. eFax Corporate® secure fax service employs the highest standards in securing your data both in transit with TLS encryption, and in storage with 256-bit AES encryption, and helps keep your faxing processes on the right side of federal regulators.

Execute Deals Faster and More Cost-Effectively

Today is an era of instantaneous financial transactions and clients' expectations that their communications move just as quickly. eFax Corporate® moves your traditional fax transmissions from the analog model of paper fax machines and unreliable old fax servers, to a faster, more convenient and cost-effective online fax service.

Eliminate the need for onsite fax machines, fax hardware or software and execute banking transactions at the speed of the Internet.

No need for your IT staff to continue managing and troubleshooting an onsite fax infrastructure.

Your institution can significantly reduce your recurring overhead costs of traditional faxing — ink, paper, toner, and dedicated fax telephone lines, in addition to IT maintenance expense.

Improve Fax Workflows and Staff Productivity

Receiving inbound faxes as email means you can conduct business when you need to and react quickly to clients around the clock. Your staff will no longer have to wait by a fax machine for a contract, waste time redialing a busy fax number, queue up an outbound fax to be sent later, troubleshoot fax machines, reboot crashing fax servers, or manage an aging fax infrastructure. Fax anywhere, any time. We'll handle everything and make faxing as easy as email for your staff. You can even keep your current fax numbers.

You Can Trust Industry Leader eFax Corporate

When it comes to entrusting your customers' personally identifiable information and other sensitive data to a cloud fax solution, you should trust only the world leader. For twenty years, that has been the same provider--eFax Corporate.

Trusted by more heavily regulated organizations than any other cloud fax provider, eFax Corporate is also the choice for most of the Fortune 500 and thousands of other midsized to large businesses.

Our cloud fax services can help your bank institution tighten up your fax security, reduce fax costs, meet SOX and GLBA compliance requirements, and improve your overall fax productivity.
